

Unit 7: Normalisation in Practice

Task: The aim of this activity is to allow you to gain some experience normalising a set of tables.

Given the following set of tables, for our property lettings example, you should develop a table structure that conforms to third normal form (3NF). This will be discussed in next week's seminar. Post your structure to the discussion below and compare your own approach with your peers. Use the guidelines provided for peer review on the department website.
